# CLEANPOWERPURESOUND

The Dmitri can be ordered as a stand alone unit, (without 20A power cord), with our world famous Mongoose, or with our new flagship power cord, the "HZ Crown Jewel", for ultimate performance.

## dmitri

Running Springs Audio Power Devices are designed and manufactured by hand in southern California, with Proprietary Precision Capacitance Technology (PPCT) to provide managed, differential power distribution to your audio/video system. The dynamic nature of RSA Power Devices is threefold:

To stabilize AC ripple noise, minimize voltage swings, manage proper voltage velocities and allow for unimpeded current propagation - line voltage irregularities and fluctuations can lead to a compressed sense of dynamics and diminished sound stage density

To significantly eliminate transient harmonics found in the vast majority of electrical topographies in today's high-tech world (most serious being the power supplies of your own components, household computers, appliances and audio/video electronic devices) by lowering the noise floor and filter line noise caused by a multitude of sources without the addition of sonic color and destruction of dynamics

To provide safety measures to insure against component threatening blackouts, brownouts, and severe line spikes without limiting current

Plugging into the RSA Power Devices will allow your components to operate at their optimum level. These extraordinary AC conditioners will establish harmonic coherence throughout your audio and/or video system. Music becomes more natural, detailed, dimensional, and life-like. Video pictures, on screens or monitors, become more vivid, with superior detail, enhanced depth, and a complete absence of AC induced noise artifacts.

### The New Reference

The new RSA Dmitri is the ultimate evolution of our work in power line conditioning technology. Utilizing our new RSA platinum series capacitors, ABAX<sup>4</sup> inductors and DMS filters, the Dmitri takes power line conditioning to the next level and beyond. With meticulous attention to detail, coupled with raw science, the Dmitri allows your components the opportunity to deliver all of the performance that your system has to offer.

- All components are designed and manufactured in our ISO 9001:2000 approved facility in Anaheim, California - USA
- Tolerances on capacitors and inductors meet or exceed 1%
- 100% passive, non-current limiting topography
- New carbon fiber resonance vibration control
- Significantly lower noise floor, blacker blacks and improved dynamics

### Jaco Elite

The RSA JACO, named after the famed fusion bassist Jaco Pastorius, offers power, flexibility and protection without sonic compromise. A complete system solution, the Jaco will improve your sound with increased dynamics, lowered noise floor and expanded sound stage.

- 20-amp/2400 watts of continuous uncompressed, uncolored power
- Employs our proprietary CNDI inductors and DMS filters
- Four isolated RSA modified BMF1 20-amp duplexes (8 outlets)
- Non-magnetic aluminum chassis
- Proprietary passive components built to +/- 1% tolerance
- Includes the RSA Mongoose 20-amp Power Cord
- 6" x 13" x 10.5" HWD
- 49lbs
- Hand made in the USA
- 5 year warranty

### Duke Elite

The Duke, designed for high-current, high-power amplifiers and subwoofer systems, enables your amp to get the same benefits that only our front-end has enjoyed up until now; a lower noise floor, increased dynamics and protection, without current limitation or sonic degradation.

- 20-amp/2400 watts of continuous uncompressed, uncolored power
- CNDI inductor and DMS filters
- Single isolated RSA modified BMF1 20-amp duplexes (2 outlets)
- Non-magnetic aluminum chassis
- Proprietary passive components built to +/- 1% tolerance
- Includes the RSA Mongoose 20-amp Power Cord
- 6" x 6.5" x 10.5" HWD
- 24lbs
- Hand made in the USA
- 5 year warranty

### Haley Elite

The Haley is an unsurpassed value. It is built to the same exacting standards as the "top of the line" RSA units. Designed for high-current amplifiers, front-end components, and smaller home theaters. The Haley gives you a noise-free background, huge dynamics, and protection for your audio/video investment.

- 15-amp/1800 watts of continuous uncompressed, uncolored power
- Three isolated RSA modified BMF1 20-amp duplexes (6 outlets)
- Non-magnetic aluminum chassis
- Proprietary passive components built to +/- 1% tolerance
- 6" x 6.5" x 10.5" HWD
- 24lbs
- Hand made in the USA
- 5 year warranty
- Available with RSA 15-amp Mongoose Power Cord (Haley Kit Option)

### RSA Power Cords

The basic truth about most power cord products is that too many companies use them as tone controls. The method: softening hard edges that gives the illusion of a quiet background – the results: destroying the fine inner detail, pace and rhythm, smearing leading edges, limiting dynamics and collapsing the soundstage. Using the highest quality materials and production techniques the RSA design team developed our Power Cords to be as neutral as possible with the greatest level of current propagation.

### Mongoose

- Available as 15-amp or 20-amp
- Cardas construction, custom lengths
- Perfect Current Delivery, No Color, No Tone Control

### HZ Crown Jewel

- 60 strand LITZ proprietary configuration
- Furutech connectors 15-amp or 20-amp
- Carbon fiber end cap dampers for RF/EMI filtering
- Perfect Power Transfer Device (PPTD)
